EXPERIENCE

Andela Rwanda   **Kigali City, Rwanda**
Web developer trainee   **June 2023- August 2023**
- I excelled in Andela's kick starter web development program with a standout project, recognized as one of the best in my cohort, demonstrating the quality of my work.

Kitech Rwanda   **Kigali City, Rwanda**
Full-stack developer   **May 2023- October 2023**
- Developed a robust backend server using Node.js and Express.js and building dynamic and responsive user interfaces with ReactJs, Boostrap and Tailwind CSS.

Nik's Consulting   **Hamamatsu, Japan**
SOFTWARE DEVELOPER   **June 2023- Nov 2023**
- Developing prototypes and implementing final frontend and backend with different web technologies like MERN, PERN stacks or with CMS like wordpress.

Self-employed   **Kigali city, Rwanda**
FREELANCE SOFTWARE DEVELOPER   **June 2023- present**
- Developing adaptable management systems tailored to solve real-world problems. So far, I have developed a management system to manage hotel operations and handling invoices.

Bank of Kigali Plc   **Kigali city, Rwanda**
Full stack Developer   **Feb 2024 – March-2024**
- During my academic internship over the past two months (Feb and March), I collaborated with the software development team at Bank of Kigali Plc. My responsibility was to develop a full-stack application using their technologies. This involved designing the product in Figma and implementing it with JavaScript,Typescript, Next.js (with React.js), and SCSS for frontend styling. For the backend, I utilized Node.js, Express.js, and PostgreSQL.

HISP RWANDA   **Kigali city, Rwanda**
Full stack Developer   **Feb 2024 – present**
- Contributing to the development and maintenance of information systems that support different countries in achieving digital healthcare delivery by using technologies like JavaScript,TypeScript, React.js, Next.js, Node.js, Nest.js, PostgreSQL, and many more.

EDUCATION
